Ungani North 1 Completed for Oil Production Testing

Since the last operations update, the first stage of the production test of the Ungani North 1 well has been successfully completed using DDH1 Rig 31. The operation included conditioning the fluid in the well and running the testing tubing completion string. The interpreted oil zone in the Ungani Dolomite is planned to be flow tested next week.

DDH1 Rig 31 is now being rigged down and will be mobilised to the Commodore 1 well site with that well planned for spud later next week.

DDH1 Rig 31 on location at Ungani North 1

About Buru Energy

Buru Energy Limited (ASX: BRU, S&P/ASX300) is a Western Australian oil and gas exploration and production company headquartered in Perth with an operational office in Broome. The Company's petroleum assets and tenements are located onshore in the Canning Basin in the southwest Kimberley region of Western Australia. Its flagship high quality conventional Ungani Oilfield project is owned in 50/50 joint venture with Mitsubishi Corporation. As well as Ungani, the Company's portfolio includes potentially world class tight gas resources.

The company's goal is to deliver material benefits to its shareholders, the State of Western Australia, the Traditional Owners of the areas in which it operates, and the Kimberley community, by successfully exploring for and developing the petroleum resources of the Canning Basin in an environmentally and culturally sensitive manner.
