ASX ANNOUNCEMENT (ASX: BRU) 7 June 2012

Weekly Drilling Progress Report Paradise-1 Deepening

Buru Energy Limited (“**Buru**” or “**Company**”) provides the following weekly update on the deepening operations at the Paradise-1 well as at 06:00hrs, 7 June 2012 (AWST).

The Paradise-1 deepening operation is the second well in the Buru – Mitsubishi Corporation (“**MC**”) 2012 Joint Exploration Program. The Paradise-1 well is located in exploration permit EP 428 on the boundary with EP 371, some 200 kms southeast of Derby. Buru and MC each have a 50% interest in this well and in EP 428, with MC contributing 80% of the cost of the well under the terms of its farm-in agreement with Buru.

Since the last progress report, the well has been drilled ahead in 6” hole to a measured depth of 2,763m in the Upper Laurel Clastics. Gas shows which appear to be consistent with the Valhalla wells have continued to be observed in this section.

In accordance with its policy of releasing weekly drilling progress reports, the Company expects to issue a further drilling progress report on 14 June 2012, subject to any material events occurring in the meantime.

Further information on the Company is available at: www.buruenergy.com
